

GABRIEL MISAO PINHEIRO KAMINISE

Backend Java Developer | SRE/DevOps | Spring Boot | AWS | Open to International Opportunities

Uberlandia, MG, Brazil | +55 34 99827-5292 | gabriel.misao08@gmail.com | linkedin.com/in/gabrielkaminise | github.com/zKaminise

PROFESSIONAL SUMMARY

Backend Java Developer with production experience in Java/Spring Boot, REST APIs, microservices, systems support, SRE/DevOps practices and observability. Experienced in monitoring applications, investigating incidents, analyzing logs and metrics, documenting root causes and collaborating with development and operations teams to improve reliability, availability and operational stability. Also works independently as a Full Stack Developer, building responsive web applications, e-commerce projects and small business systems from requirements gathering to deployment and support.

CORE SKILLS

Backend: Java, Spring Boot, REST APIs, Microservices, Maven, JPA/Hibernate, SOLID, JUnit

SRE/DevOps: Observability, Incident Response, RCA, Postmortems, Logs, Metrics, Alerts, CI/CD

Cloud/Infra: AWS, EKS, EC2, Load Balancers, Docker, Kubernetes, Terraform, production support

Databases: SQL, Oracle, PostgreSQL, JDBC, queries, data manipulation and troubleshooting

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, responsive interfaces

Tools: Git, GitHub, Jira, Postman, IntelliJ IDEA, Eclipse, dashboards, Google Analytics, Meta Pixel

Languages: Portuguese: Native | English: Intermediate/Upper-Intermediate, improving professional speaking fluency

PROFESSIONAL EXPERIENCE

Java Developer | SRE | DevOps | OSF Digital

Oct 2024 - Present | Brazil | Remote

Key stack: Java, Spring Boot, REST APIs, Microservices, AWS, EKS, EC2, Load Balancers, CI/CD, Observability

- Develop and maintain REST APIs and microservices using Java and Spring Boot, applying clean code, reliability and maintainability principles.
- Support production systems by monitoring applications, infrastructure and service health across cloud-based environments.
- Investigate incidents using logs, metrics and observability tools, documenting findings, root causes and remediation actions.
- Participate in incident response, post-incident reviews and continuous improvement initiatives to reduce recurring issues.
- Collaborate with Development and DevOps teams to improve alerts, dashboards, deployments, operational visibility and system stability.
- Support AWS workloads and infrastructure components, including EKS, EC2, Load Balancers, production environments and CI/CD pipelines.

Founder & Full Stack Developer | GK Digital Solutions

2024 - Present | Uberlandia, MG, Brazil | Remote | Freelance

Key stack: React, TypeScript, JavaScript, HTML, CSS, Java, Spring Boot, SQL, payment and marketing integrations

- Build websites, landing pages, e-commerce projects and small web systems for small businesses, schools, clinics and service providers.
- Create responsive and business-oriented interfaces using React, TypeScript, HTML, CSS and modern web development practices.
- Develop small custom features and systems using Java, Spring Boot, databases and external integrations when required by client projects.
- Lead end-to-end delivery, including requirements gathering, solution planning, interface structure, development, publishing and support.
- Integrate websites with WhatsApp, forms, paid traffic tools, Google Analytics, Meta Pixel, payment systems, domains and hosting services.

Support Analyst | Sankhya Gestão de Negócios

Jan 2023 - Oct 2024 | Uberlandia, MG, Brazil | On-site

Key stack: SQL, Oracle, ERP systems, technical support, documentation, testing and client communication

- Provided technical and business support to clients and implementation consultants, handling simple, critical and complex service requests.
- Queried and manipulated data in DBMS environments, including SQL and Oracle, to analyze issues and support ticket resolution.
- Created and improved knowledge base documentation with test scenarios, error simulations and step-by-step troubleshooting instructions.
- Collaborated with teammates to analyze system behavior, understand client processes and improve support quality.

EDUCATION

Information Systems | Federal University of Uberlandia (UFU) | 2023 - 2027 | Expected graduation: 2027

Systems Analysis and Development | Pitagoras University - Uberlandia | 2022 - 2024 | Completed
